

Fire Sprinkler System Information and Installer Certification

Attention: Do not remove or cover this label

This dwelling unit contains a residential fire sprinkler system. The system installer certifies that the system complies with the requirements of Title 25, California Code of Regulations, sections 4300 through 4324 and NFPA 13D, *Standard for the Installation of Sprinkler Systems in One and Two Family Dwellings and Manufactured Homes* 1999 Edition. **Do not change** (alter) the fire sprinkler system without approval of the California Department of Housing and Community Development, Division of Codes and Standards. A homeowner **may perform repairs** without the Department's approval, **if all material and devices installed are the same type or characteristics** as the materials and devices replaced. Please refer to section 4324 of the above noted regulations. Only the homeowner may change (alter) or repair the fire sprinkler system as an owner/builder without violating the State Contractors Licensing Board requirements. Any other person making changes (alterations) or repairs to the system must hold a valid C-16 contractor's license. Future additions of heat sources, such as, a wood burning stove or fireplace, may adversely affect the performance of sprinklers and may activate one or more sprinklers. You may obtain permits and information about fire sprinkler systems from the California Department of Housing & Community Development, Division of Codes and Standards.
